PREMIUM ITEMS **Speed Rope**

PRODUCT OVERVIEW ▼

Coredeluxe Speed Rope features with adjustable speed cable and precision ball-bearing system as our standard design, but with shorter, tapered handles.

They come in several different color finish options, and include sandblast textured spindles with a reliable, fine-knurled grip and laser-etched Coredeluxe branding.

Other updates with this Speed Rope include the use of high speed oil (rather than grease) in the bearing system, and the introduction of a new lightweight aluminum head (in place of steel), which is CNC machined and anodized.

For quality construction, blazing speed, smooth spin, and a customizable look, the Coredeluxe Speed Rope knows no rivals. Customized logo printing available.

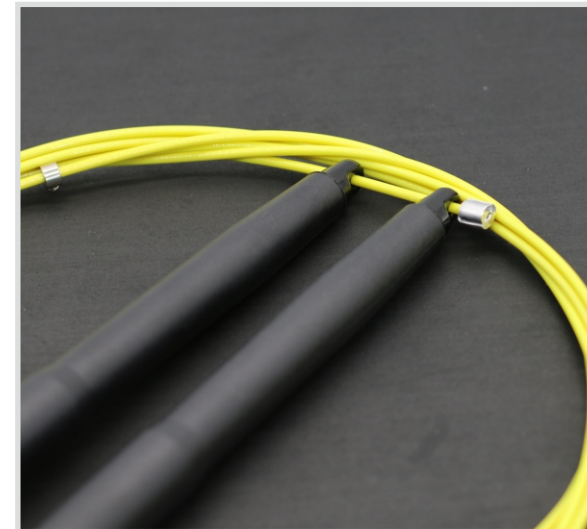

NO:2

SPECIFICATIONS:

Material: Plastic handle+Plastic head+ Nylon coated braided steel cable.

Size: Cable length, 300cm; Handle Length, 140mm.

1. Bearings: Four Hi-Precision deep groove Ball Bearings per rope.
2. Adjustment: adjustable end with a fixed swaged end.
3. Indestructible Plastic Handgrip , Nylon cable and bearing.
